

# Omega Pacific LINK CAMS

It Is Possible

WHO DOESN'T WANT THE  
GREATEST EXPANSION  
RANGE AVAILABLE?

Link Cams have the largest expansion range of any cam on the market - single or double axle designs!

One Link Cam covers the same range as up to four of our competitors cams, plus the unique expansion eliminates any need for specialized "offset cams" for flared protection.

Thanks to a constant cam angle of 13.5 degrees, we achieve our range without sacrificing holding power.

Quite simply, the Link Cam is the most sophisticated and modern camming device in the world. The choice is clear.

Minimize the time spent fooling with gear - grab a Link Cam for the perfect fit!

BRAND NEW  
Link Cam #.5

The same cure for panic as the larger Link Cams, now in a compact finger crack size.

Only weighs 3.4 ounces!
